## 4. FIRST AID MEASURES

### 4.1 Description of first aid measures

#### General advice

Consult a qualified medical professional. Show this data sheet to the doctor in attendance. Move out of the dangerous area. Never give anything by mouth to an unconscious person.

**If ingested**

Give several glasses of water to drink to dilute. If large amounts are ingested, get medical advice.

**Skin contact**

Wash with soap and water. Cover the irritated skin with an emollient. Get medical attention if irritation develops.

**Eye contact**

Flush eyes with plenty of water. Check for and remove any contact lenses if possible. Continue flushing eyes with water for at least 15 minutes. Get medical attention if irritation occurs.

**Inhalation**

Move individual to fresh air. If breathing is difficult, get medical attention.

**4.2 Most important symptoms and effects, both acute and delayed**

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or section 11.

**4.3 Indication of any immediate medical attention and special treatment needed**

**5. FIREFIGHTING MEASURES****5.1 Extinguishing media**

Suitable extinguishing media : Any media suitable for the surrounding fire.

**5.2 Special hazards arising from the substance or mixture**

Fire hazards : Oxides of carbon and silicon may be formed when heated  
Explosion hazards : Not considered to be an explosion hazard

**5.3 Advice for firefighters**

Use protective clothing and breathing equipment appropriate for the surrounding fire.

**6. ACCIDENTAL RELEASE MEASURES****6.1 Personal precautions, protective equipment and emergency procedures**

Avoid breathing dust. Dust mask is essential if conditions are dusty. Wear appropriate protective clothing. Ensure adequate ventilation. For personal protection see section 8 for exposure limits.

**6.2 Environmental precautions**

No special precautions.

**6.3 Methods and materials for containment and cleaning up**

Use appropriate tools to put the spilled solid in a convenient waste disposal container. Vacuuming or wet sweeping may be used to avoid dust dispersal. Dispose of material according to local and regional requirements. Water used to clean contaminated surfaces may be allowed to evacuate through the sanitary system.

**7. HANDLING AND STORAGE**

**7.1 Precautions for safe handling**

Avoid contact with skin and eyes. Do not breathe dust.  
Containers of this material may be hazardous when empty since they retain product residues (e.g. dust, solids). For precautions see section 2.2.

**7.2 Conditions for safe storage, including any incompatibilities**

Suitable for any general chemical storage area.  
Keep container tightly closed.  
Do not store super sacks outside; ultraviolet radiation and other adverse conditions will negatively impact its integrity and may eventually cause the bag to fail.

**7.3 Specific end use(s)**

Apart from the uses mentioned in section 1.2, no other specific uses are stipulated.

**8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

**8.1 Control parameters/exposure limits**

## 8.2 Appropriate engineering controls

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit. Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday. Facilities that store or handle this material should be equipped with an eyewash station.

## 8.3 Personal protective equipment

Safety glasses, lab coat, and dust respirator. Be sure to use an NIOSH approved respirator or equivalent.
